Technical Equipment List (Common)

Seat Right

The right-side seat in an ambulance is designed for medical personnel to have easy access to the patient during transport. It is typically equipped with safety harnesses and strategically positioned to allow quick access to medical equipment and supplies.

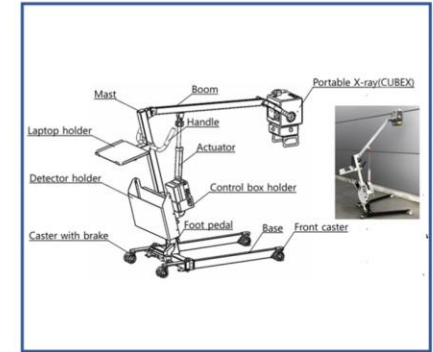

Light Bar and Siren Flashing Type

A light bar and siren on an ambulance signal urgency during emergencies. The light bar emits flashing lights, and the siren produces loud sounds, alerting others to make way.

Air Conditioner

An air conditioner for an ambulance is a specialized cooling system designed to maintain a comfortable and stable temperature inside the vehicle, ensuring the safety and comfort of patients and medical personnel.

CUBE STAND

A cube stand ambulance is a box-shaped emergency vehicle designed to maximize interior space for medical equipment and personnel, providing efficient and effective patient care during transport.

Cabinets (foam board)

Ambulance foam board cabinets are lightweight, durable, and moisture-resistant, offering efficient storage for medical supplies.

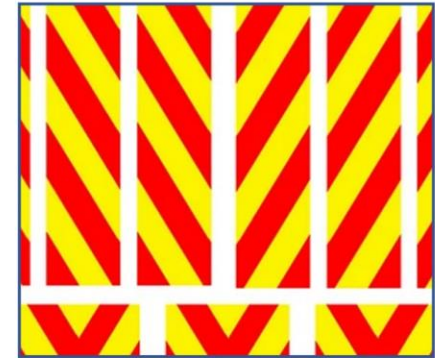

Seat at Separation Wall

A seat at the separation wall in an ambulance provides a secure place for medical personnel to sit while attending to the patient, allowing easy access to both the patient and essential equipment during transport.

Side Warning Light

Side warning lights on an ambulance enhance visibility from all angles, alerting other drivers and pedestrians to the vehicle's presence, especially when maneuvering through intersections or around obstacles during emergencies.

Reflective Sheeting & Logos

Reflective sheeting and logos are materials used on vehicles, signage, and clothing to enhance visibility, especially in low-light conditions. Reflective sheeting is made from microprismatic or glass bead technology, which reflects light back to its source.

Main Stretcher

It is designed as folding type stretcher. When it is not used, it can be stored as its folded. It has 2 adjustable strap, two double handles and a double wheel. Sitting and reclining sections are not made of flammable, stain-resistant and non-allergenic material.

Stretcher Platform

Transfer stretcher can be loaded and by one person into the ambulance. It has 3 pieces of seat belt and it can be laid by adjustable handle makes. It has mattress which is anti-bacterial, flame retardant and easy to clean.

Stretcher platform provide an easy and stable position for main stretcher. It is made of stainless steel.

Chair - Foldable Stretcher

It is designed as folding type stretcher. When it is not used, it can be stored as its folded. It has 2 adjustable strap, two double handles and a double wheel. Sitting and reclining sections are not made of flammable, stain-resistant and non-allergenic material.
